

ENVIRONMENTAL POLICY

Patentes Talgo, SLU, is aware of the necessity of environment-friendly performance of its activities in design, manufacture and maintenance of the rolling stock. The company assumes the commitment to protect the environment and to mitigate the potentially adverse effects, considering the context where it is developed and bases its activity on the following principles:

- ♣ Comply with the current legislation and environmental regulations, as well as with other applicable environmental requirements.*
- ♣ Establish a process of Continual Improvement of the environmental management, defining the environmental objectives for the environmental performance improvement.*
- ♣ Implement the environmental criteria and measures to control the environmental aspects and to reduce the environmental impact of the activities, products and services, providing by the company at all the stages: design, manufacturing and maintenance of the rolling stock.*
- ♣ Integrate the pollution prevention principle and the risk management during the planning of new activities, products, services, and the modification of existing ones.*
- ♣ Disseminate the Environmental Policy to all interested parties, keeping it available to all of them. Implement the necessary training actions for staff in order to achieve the environmental consciousness.*
- ♣ Implement the control systems, allocate the responsibilities and perform the audits and revisions, necessary to verify the correct functioning of the Environmental Management System and to comply with this Policy.*
